

Introduced by Senator Beall

February 16, 2016

An act to add Section 164.2 to the Streets and Highways Code, relating to transportation.

LEGISLATIVE COUNSEL'S DIGEST

SB 1066, as introduced, Beall. Transportation funds: fund estimates.

Existing law establishes the state transportation improvement program process, pursuant to which the California Transportation Commission programs, on a biennial basis, available state and federal funds for transportation capital improvement projects, other than state highway rehabilitation and repair projects, for the 5-year period of the state transportation improvement program, based on the interregional transportation improvement program prepared by the Department of Transportation and the regional transportation improvement programs prepared by regional transportation planning agencies. Existing law requires the Department of Transportation to submit to the California Transportation Commission an estimate of state and federal funds reasonably expected to be available for future programming over the 5-year period in each state transportation improvement program, and requires the California Transportation Commission to adopt a fund estimate in that regard.

This bill would require the fund estimates prepared by the department and the commission to identify and include federal funds derived from apportionments made to the state under the Fixing America's Surface Transportation Act of 2015.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:
